🗨 AshokPrjapati

Summary

Highly skilled Assistant Frontend Developer with 1.5 years of experience delivering feature-rich, user-friendly web applications at Revlitix. Proficient in React, TypeScript, and Tailwind CSS, with a proven ability to optimize performance, improve scalability, and enhance user experience. Successfully reduced page load times by 60% and implemented AI-driven features, empowering users with actionable insights.

WORK EXPERIENCE

Revlitix

Assistant Frontend Developer

July-2023 - Present

- **Report Revamp:** Redesigned the reporting system, enabling users to create and manage reports with 13+ interactive chart types, improving report generation efficiency by 30%.
- **Performance Optimization:** Boosted performance for large datasets by implementing lazy loading, memoization, and virtual scrolling, achieving a 60% reduction in page load times.
- **Advanced Filtering System:** Developed a robust filtering feature using nested AND/OR operators, enhancing user flexibility and reducing the time taken to create complex conditions by 30%.
- **Role-Based Access Control:** Built a scalable access control system for admins, managers, and custom roles, improving permission management and reducing administrative overhead by 20%.
- **Widget Customization & AI Insights:** Enhanced user experience by introducing advanced widget customization features and AI-powered insights (e.g., automated summaries, widget analysis), increasing user engagement and productivity by 25%.
- **Code Quality & Refactoring:** Refactored legacy code, reducing bugs by 50% and improving maintainability across module.
